1. PRODUCT AND COMPANY IDENTIFICATION

Product name
Roundup PRO® Herbicide

EPA Reg. No.
524-475

Product use
Herbicide

Chemical name
Not applicable.

Synonyms
None.

Company
MONSANTO COMPANY, 800 N. Lindbergh Blvd., St. Louis, MO, 63167
Telephone: 800-332-3111, Fax: 314-694-5557
E-mail: safety.datasheet@monsanto.com

Emergency numbers
FOR CHEMICAL EMERGENCY, SPILL LEAK, FIRE, EXPOSURE, OR ACCIDENT Call CHEMTREC - Day or Night: 1-800-424-9300 toll free in the continental U.S., Puerto Rico, Canada, or Virgin Islands. For calls originating elsewhere: 703-527-3887 (collect calls accepted).
FOR MEDICAL EMERGENCY - Day or Night: +1 (314) 694-4000 (collect calls accepted).

2. HAZARDS IDENTIFICATION

Emergency overview
Appearance and odour (colour/form/odour): Clear - Amber / Liquid / Sweet

CAUTION!
CAUSES EYE IRRITATION

Potential health effects
Likely routes of exposure
Skin contact, eye contact

Eye contact, short term
May cause temporary eye irritation.

Skin contact, short term
Not expected to produce significant adverse effects when recommended use instructions are followed.

Inhalation, short term
Not expected to produce significant adverse effects when recommended use instructions are followed.

Single Ingestion
Not expected to produce significant adverse effects when recommended use instructions are followed.

Refer to section 11 for toxicological and section 12 for environmental information.

OSHA Status
This product is hazardous according to the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

3. COMPOSITION/INFORMATION ON INGREDIENTS
Active ingredient
Isopropylamine salt of N-(phosphonomethyl)glycine; (Isopropylamine salt of glyphosate)

Composition

<table>
<thead>

</table>

Trade secret composition.

4. FIRST AID MEASURES

Use personal protection recommended in section 8.

Eye contact
If in eyes, hold eye open and rinse slowly and gently for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.

Skin contact
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Inhalation
If inhaled, move person to fresh air. If person is not breathing, call emergency number or ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

Ingestion
Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water or milk if able to swallow. Do not induce vomiting unless told to do so by the poison center or doctor. Do not give anything by mouth to an unconscious person.

Advice to doctors
This product is not an inhibitor of cholinesterase.

Antidote
Treatment with atropine and oximes is not indicated.

5. FIRE-FIGHTING MEASURES

Flash point
None.

Extinguishing media
Recommended: Water, foam, dry chemical, carbon dioxide (CO2)

Unusual fire and explosion hazards
Minimise use of water to prevent environmental contamination.
Environmental precautions: see section 6.

Hazardous products of combustion
Carbon monoxide (CO), phosphorus oxides (PₓOᵧ), nitrogen oxides (NOₓ)

Fire fighting equipment
Self-contained breathing apparatus.
Equipment should be thoroughly decontaminated after use.
6. ACCIDENTAL RELEASE MEASURES

Personal precautions
Use personal protection recommended in section 8.

Environmental precautions
SMALL QUANTITIES:
Low environmental hazard.
LARGE QUANTITIES:
Minimise spread.
Keep out of drains, sewers, ditches and water ways.

Methods for cleaning up
SMALL QUANTITIES:
Flush spill area with water.
LARGE QUANTITIES:
Absorb in earth, sand or absorbent material.
Dig up heavily contaminated soil.
Collect in containers for disposal.
Refer to section 7 for types of containers.
Flush residues with small quantities of water.
Minimise use of water to prevent environmental contamination.

Refer to section 13 for disposal of spilled material.
Use handling recommendations in Section 7 and personal protection recommendations in Section 8.

7. HANDLING AND STORAGE

Good industrial practice in housekeeping and personal hygiene should be followed.

Handling
Avoid contact with eyes.
When using do not eat, drink or smoke.
Wash hands thoroughly after handling or contact.
Wash contaminated clothing before re-use.
Thoroughly clean equipment after use.
Do not contaminate drains, sewers and water ways when disposing of equipment rinse water.
Refer to section 13 of the safety data sheet for disposal of rinse water.
Emptied containers retain vapour and product residue.
FOLLOW LABELLED WARNINGS EVEN AFTER CONTAINER IS EMPTIED.

Storage
Minimum storage temperature: -15 °C
Maximum storage temperature: 50 °C
Compatible materials for storage: stainless steel, fibreglass, plastic, glass lining
Incompatible materials for storage: galvanised steel, unlined mild steel, see section 10.
Keep out of reach of children.
Keep away from food, drink and animal feed.
Keep only in the original container.
Keep container tightly closed in a cool, well-ventilated place.
Partial crystallization may occur on prolonged storage below the minimum storage temperature.
If frozen, place in warm room and shake frequently to put back into solution.
Minimum shelf life: 5 years.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION
Airborne exposure limits

</tbody>
</table>

Engineering controls
No special requirement when used as recommended.

Eye protection
If there is significant potential for contact:
Wear chemical goggles.

Skin protection
If repeated or prolonged contact:
Wear chemical resistant gloves.
Applicators and other handlers must wear:
Wear long sleeved shirt, long pants and shoes with socks.

Respiratory protection
No special requirement when used as recommended.

When recommended, consult manufacturer of personal protective equipment for the appropriate type of equipment for a given application.

9. PHYSICAL AND CHEMICAL PROPERTIES

These physical data are typical values based on material tested but may vary from sample to sample. Typical values should not be construed as a guaranteed analysis of any specific lot or as specifications for the product.

10. STABILITY AND REACTIVITY
Stability
Stable under normal conditions of handling and storage.

Oxidizing properties
No data.

Materials to avoid/Reactivity
Reacts with galvanised steel or unlined mild steel to produce hydrogen, a highly flammable gas that could explode.

Hazardous decomposition
Thermal decomposition: Hazardous products of combustion: see section 5.

Self-accelerating decomposition temperature (SADT)
No data.

11. TOXICOLOGICAL INFORMATION

This section is intended for use by toxicologists and other health professionals.

Data obtained on product and components are summarized below.

Acute oral toxicity
Rat, LD50: 5,108 mg/kg body weight
Practically non-toxic.
FIFRA category IV.

Acute dermal toxicity
Rat, LD50 (limit test): > 5,000 mg/kg body weight
Practically non-toxic.
FIFRA category IV.
No mortality.

Acute inhalation toxicity
Rat, LC50, 4 hours, aerosol: 2.9 mg/L
Other effects: weight loss, breathing difficulty
Practically non-toxic.
FIFRA category IV.

Skin irritation
Rabbit, 6 animals, OECD 404 test:
Days to heal: 3
Primary Irritation Index (PII): 0.5/8.0
Essentially non irritating.
FIFRA category IV.

Eye irritation
Rabbit, 6 animals, OECD 405 test:
Days to heal: 3
Slight irritation.
FIFRA category III.

Skin sensitization
Guinea pig, 3-induction Buehler test:
Positive incidence: 0 %

N-(phosphonomethyl)glycine; (glyphosate)

Mutagenicity
In vitro and in vivo mutagenicity test(s):
Not mutagenic.

Repeated dose toxicity
Rabbit, dermal, 21 days:
- NOAEL toxicity: > 5,000 mg/kg body weight/day
- Target organs/systems: none
- Other effects: none

Rat, oral, 3 months:
- NOAEL toxicity: > 20,000 mg/kg diet
- Target organs/systems: none
- Other effects: none

Chronic effects/carcinogenicity
Mouse, oral, 24 months:
- NOAEL toxicity: ~ 5,000 mg/kg diet
- Target organs/systems: liver
- Other effects: decrease of body weight gain, histopathologic effects
- NOEL tumour: > 30,000 mg/kg diet
- Tumours: none

Rat, oral, 24 months:
- NOAEL toxicity: ~ 8,000 mg/kg diet
- Target organs/systems: eyes
- Other effects: decrease of body weight gain, histopathologic effects
- NOEL tumour: > 20,000 mg/kg diet
- Tumours: none

Toxicity to reproduction/fertility
Rat, oral, 2 generations:
- NOAEL toxicity: 10,000 mg/kg diet
- NOAEL reproduction: > 30,000 mg/kg diet
- Target organs/systems in parents: none
- Other effects in parents: decrease of body weight gain
- Target organs/systems in pups: none
- Other effects in pups: decrease of body weight gain
- Effects on offspring only observed with maternal toxicity.

Developmental toxicity/teratogenicity
Rat, oral, 6 - 19 days of gestation:
- NOAEL toxicity: 1,000 mg/kg body weight
- NOAEL development: 1,000 mg/kg body weight
- Other effects in mother animal: decrease of body weight gain, decrease of survival
- Developmental effects: weight loss, post-implantation loss, delayed ossification
- Effects on offspring only observed with maternal toxicity.

Rabbit, oral, 6 - 27 days of gestation:
- NOAEL toxicity: 175 mg/kg body weight
- NOAEL development: 175 mg/kg body weight
- Target organs/systems in mother animal: none
- Other effects in mother animal: decrease of survival
- Developmental effects: none

12. ECOLOGICAL INFORMATION

This section is intended for use by ecotoxicologists and other environmental specialists.

Aquatic toxicity, fish
- Rainbow trout (Oncorhynchus mykiss):
  - Acute toxicity, 96 hours, static, LC50: 5.4 mg/L
  - Moderately toxic.

- Bluegill sunfish (Lepomis macrochirus):
  - Acute toxicity, 96 hours, static, LC50: 7.3 mg/L
  - Moderately toxic.

Aquatic toxicity, invertebrates
- Water flea (Daphnia magna):
Acute toxicity, 48 hours, static, EC50: 11 mg/L
Slightly toxic.

**Avian toxicity**

Mallard duck (Anas platyrhynchos):
Dietary toxicity, 5 days, LC50: > 5,620 mg/kg diet
Practically non-toxic.

Bobwhite quail (Colinus virginianus):
Dietary toxicity, 5 days, LC50: > 5,620 mg/kg diet
Practically non-toxic.

**Arthropod toxicity**

Honey bee (Apis mellifera):
Oral/contact, 48 hours, LD50: > 100 µg/bee
Practically non-toxic.

**Soil organism toxicity, invertebrates**

Earthworm (Eisenia fetida):
Acute toxicity, 14 days, LC50: > 1,250 mg/kg soil
Practically non-toxic.

**Similar formulation**

**Aquatic toxicity, algae/aquatic plants**

Green algae (Selenastrum capricornutum):
Acute toxicity, 72 hours, static, EbC50 (biomass): 12.4 mg/L
Slightly toxic.

**Similar formulation**

**Soil organism toxicity, microorganisms**

Nitrogen and carbon transformation test:
30 L/ha, 28 days: Less than 25% effect on nitrogen or carbon transformation processes in soil.

**N-(phosphonomethyl)glycine; { glyphosate}**

**Bioaccumulation**

Bluegill sunfish (Lepomis macrochirus):
Whole fish: BCF: < 1
No significant bioaccumulation is expected.

**Dissipation**

Soil, field:
Half life: 2 - 174 days
Koc: 884 - 60,000 L/kg
Adsorbs strongly to soil.

Water, aerobic:
Half life: < 7 days

---

**13. DISPOSAL CONSIDERATIONS**

**Product**
Excess product may be disposed of by agricultural use according to label instructions.
Keep out of drains, sewers, ditches and water ways.
Recycle if appropriate facilities/equipment available.
Burn in proper incinerator.
Follow all local/regional/national/international regulations.

**Container**
See the individual container label for disposal information.
Emptied containers retain vapour and product residue.
Observe all labelled safeguards until container is cleaned, reconditioned or destroyed.
Empty packaging completely.
Triple or pressure rinse empty containers.
Do NOT contaminate water when disposing of rinse waters.
Store for collection by approved waste disposal service.
Ensure packaging cannot be reused.
Do NOT re-use containers.
Recycle if appropriate facilities/equipment available.
Follow all local/regional/national/international regulations.

Use handling recommendations in Section 7 and personal protection recommendations in Section 8.

14. TRANSPORT INFORMATION

The data provided in this section is for information only. Please apply the appropriate regulations to properly classify your shipment for transportation.

Not hazardous under the applicable DOT, ICAO/IATA, IMO, TDG and Mexican regulations.

15. REGULATORY INFORMATION

TSCE Inventory
All components are on the US EPA's TSCE Inventory

OSHA Hazardous Components
Surfactant

SARA Title III Rules
Section 311/312 Hazard Categories
Immediate
Section 302 Extremely Hazardous Substances
Not applicable.
Section 313 Toxic Chemical(s)
Not applicable.

CERCLA Reportable quantity
Not applicable.

16. OTHER INFORMATION

The information given here is not necessarily exhaustive but is representative of relevant, reliable data.
Follow all local/regional/national/international regulations.
Please consult supplier if further information is needed.
In this document the British spelling was applied.
|| Significant changes versus previous edition.

This Material Safety Data Sheet (MSDS) serves different purposes than and DOES NOT REPLACE OR MODIFY THE EPA-APPROVED PRODUCT LABELING (attached to and accompanying the product container). This MSDS provides important health, safety, and environmental information for employers, employees, emergency responders and others handling large quantities of the product in activities generally other than product use, while the labeling provides that information specifically for product use in the ordinary course. Use, storage and disposal of pesticide products are regulated by the EPA under the authority of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) through the product labeling, and all necessary and appropriate precautionary, use, storage, and disposal information is set forth on that labeling. It is a violation of federal law to use a pesticide product in any manner not prescribed on the EPA-approved label.

Although the information and recommendations set forth herein (hereinafter "Information") are presented in good faith and believed to be correct as of the date hereof, MONSANTO Company or any of its subsidiaries makes no representations as to the completeness or accuracy thereof. Information is supplied upon the condition that the persons receiving same will make their own determination as to its suitability for the purposes prior to use. In no event will MONSANTO Company or any of its subsidiaries be responsible for damages of any nature whatsoever resulting from the use of or reliance upon information. NO REPRESENTATIONS OR WARRANTIES, EITHER EXPRESS OR IMPLIED, OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR OF ANY OTHER NATURE ARE MADE HEREUNDER WITH RESPECT TO INFORMATION OR TO THE PRODUCT TO WHICH INFORMATION REFERS.

FERTILIZER with LockUp™ plus Dimension Weed Control

19-0-6

MESA

GUARANTEED ANALYSIS

Total Nitrogen (N) ........................................................................ 19%
Phosphorus (P₂O₅) .................................................................... 7%
Potassium (K₂O) ........................................................................ 6%
Other Nutrients: ........................................................................ 5%
Sulfur (S) .................................................................................. 5%

100% of product contains: 19-0-6

For preemergence control of listed annual and perennial broadleaf weeds, and preemergence control of listed annual grassy weeds and broadleaf weeds, on established residential lawns, golf courses, parks, sports fields, and around commercial buildings and other recreational and commercial turfgrass areas.

ACTIVE INGREDIENTS:

2,4-Dechlorophenoxyacetic Acid (DPA) ........................................ 10%
Pronamide .............................................................................. 25%
Zinc, Copper, Manganese, Iron, Boron, and Molybdenum (trace elements) 6%

OTHER INGREDIENTS:

Total .......................................................................................... 100%

USE DIRECTIONS:

1. Read entire label carefully before using this product. Follow all label directions. Apply only to the areas listed on the label.

2. Do not burn or incinerate. Do not apply to turf or vegetation within 24 hours of harvest.

3. Do not use on turfgrass that is to be used as seed, for animal consumption, or to grow flowers or vegetables. Do not use near irrigation systems or storm drains.

4. Do not apply to areas where children or domestic animals may enter during or immediately after application. Do not apply to turf adjacent to areas outside the treated area where children or domestic animals may enter.

5. Do not contaminate off-site areas by exceeding the labels rates or application.

6. Do not apply in windy conditions, when rain is expected, or when dew is present.

7. Use care when handling, mixing, and applying this product. Do not allow children or animals to enter treated areas until they are thoroughly dry. Do not use equipment that has begun to wear out.

8. Apply at the rates shown on the label. Do not exceed the maximum rate shown on the label.

9. When using this product, use Personal Protective Equipment (PPE). A respirator, apron, and gloves must be worn. Remove PPE before handling treated turf or entering treated areas.

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Personal Protective Equipment (PPE):

All farmers, workers, applicators, and other handlers must wear:

- Long-sleeved shirt
- Long pants
- Gloves
- Chemical-resistant goggles or face shield
- Shoes
- Mask

Follow each manufacturer's instructions for cleaning and storing the PPE. A respirator is recommended for motorists and truckers. Do not use PPE beyond its recommended time.

KEEP OUT OF REACH OF CHILDREN
CAUTION
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)
See back panel for First Aid and additional Precautionary Statements.

NOTICE: Read the entire label. Use only according to label directions. Before buying this product, read the Warranty Section elsewhere on this label. If terms are not acceptable, return the unopened container at once.

In the state of New York, this product may be applied only by commercial applicators at no more than 294 lb (0.5 lb. active ingredient of dithiony) per acre (6.8 lb. per 1000 sq ft) per year. Use of this product in Nassau and Suffolk Counties of New York is prohibited.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION
Harmful if swallowed, inhaled or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Avoid breathing dust. Wear protective eyewear, long-sleeved shirt, long pants, socks, shoes, and chemical-resistant gloves made of any waterproof material. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove contaminated clothing and wash before reuse. Prolonged or frequently repeated skin contact while handling this material may cause allergic reaction in some individuals.

Personal Protective Equipment (PPE)
All mixers, loaders, applicators and other handlers must wear:
Long-sleeved shirt and long pants
Chemical-resistant gloves made of any waterproof material
Shoe plus socks
Protective eyewear

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Manufactured by:
Lebanon Seaboard Corporation

Made in the U.S.A.

NET WEIGHT 40 LBS. (18.14 KG)
FIRST AID

IF SWALLOWED:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

IF INHALED:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

IF IN EYES:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact (888)208-1368 for emergency medical treatment information.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and highly toxic to other aquatic organisms including crayfish and shrimp. Use with care when applying to turf areas adjacent to any body of water. Drift and runoff from treated turf may adversely affect aquatic organisms in adjacent aquatic sites. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and run off may be hazardous to aquatic organisms in water adjacent to treated areas. Do not apply when conditions favor drift from treated areas. Do not contaminate water when disposing of equipment washwaters or rinsate.

This product contains 2,4-D that has properties and characteristics associated with chemicals detected in groundwater. The use of this product in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a stream or well may result in contamination of drinking water or groundwater.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying.

USE PRECAUTIONS AND RESTRICTIONS

- Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes.
- Do not apply this product to Dichondra, carpetgrass, St. Augustine grass, bahiagrass, or to golf courses putting greens or tees, or turfgrass containing desirable clovers.
- Do not apply this product directly to, or otherwise permit this product to come into contact with, flowers, ornamental shrubs or trees, or other desirable broadleaf plants, as serious plant injury may occur.
- Do not apply to centipedegrass during the period of winter dormancy. Apply to actively growing grass. Use of this product on certain varieties of creeping bentgrass, such as 'Columbia', 'Carmen', 'Seaside', and 'Washington' may result in undesirable turfgrass injury. Not all varieties of creeping bentgrass have been tested.
- Do not apply this product to Colonial bentgrass (Agrostis stolonifera).
- Use of this product on certain varieties of fine fescue may result in undesirable turf injury. The following fine fescue varieties have been found to be sensitive to this product: 'Buehler', 'Tanner', 'Beauty', 'Biligard', 'CF-6', 'Enjoy', 'HF-83', 'Highlight', 'Ike', 'Jamestown', 'Koker', 'Majesta', 'Mary', 'Pennlawn', 'Tamans', 'Tajina', 'Widow', and 'Walden'. Not all varieties of fine fescue have been tested.
- Do not use this product on seeding bentgrass in the spring of the first year of establishment until the turfgrass is fully green and has established new roots.
- The active ingredient in this product may leave residues in treated grass clippings which could be harmful to some plants and trees. Do not collect treated grass clippings for use as mulch around plants, vegetables or fruit trees. The applicator must notify the appropriate residents/individuals of this precaution when this product is applied by a lawn service/commercial applicator.
- Some yelowing on solid (monoculture) stands of perennial ryegrass or tall fescue may occur within two weeks of application of this product. Any discoloration is transitory and will dissipate under adequate growing conditions.
- To minimize the potential for turfgrass injury, allow four weeks between applications.
- Do not water, mow or disturb treated area for 48 hours after application.
- Do not make more than two applications of this product per acre per year.
- Do not allow people or pets to enter treated area until dust has settled.
- Do not graze livestock or feed forage cut from areas treated with this product.

Note: It is not possible to evaluate all turfgrass varieties for resistance to this product. It is suggested that the user evaluate the response of turfgrass varieties not listed on this label on a limited area, at specified use rates, prior to initiating large-scale use.
Precautions for Re-seeding, Over-seeding, or Sprigging

- Re-seeding, over-seeding, or sprigging of an area treated with this product within 10 weeks after a single application of this product or within 16 weeks after split application program totaling 6.8 lb/1000 sq ft (0.5 lb active ingredient per acre) or more may inhibit the establishment of desirable turfgrasses.
- When reseeding or over-seeding, follow established cultivation practices for seedbed preparation, seeding, irrigation and fertilization.
- For best over-seeding results, use mechanical or power seeding equipment (lift seeders) designed to provide good contact between soil and seed.

Application Directions for Turf

- This product provides pre-emergence control of listed broadleaf and gramineous weeds, including crabgrass, in established turfgrasses (including the large, smooth, and southern species) when applied prior to their germination.
- This product provides post-emergence control of listed broadleaf weeds.
- This product also provides early post-emergence control of crabgrass if applied prior to the 3-leaf stage of growth or first tiller. This stage of growth normally corresponds to the time when crabgrass seedlings first become visible in the established turfgrass. The practical benefit of early post-emergence crabgrass control is a 2-4 week longer period of time (window of application) during which crabgrass control can be achieved.

This product is for use on the following established turfgrass species

**Established Cool Season Turfgrass**

<table>
<thead>
<tr>
<th>Common Name</th>
<th>Scientific Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bluegrass</td>
<td>Poa pratensis</td>
</tr>
<tr>
<td>Kentucky fescue</td>
<td>Festuca arundinacea</td>
</tr>
<tr>
<td>Tall fescue</td>
<td>Lolium perenne</td>
</tr>
</tbody>
</table>

**Established Warm Season Turfgrass**

<table>
<thead>
<tr>
<th>Common Name</th>
<th>Scientific Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bermuda grass</td>
<td>Cynodon dactylon</td>
</tr>
<tr>
<td>Centipede grass</td>
<td>Eremothecium herbaceum</td>
</tr>
<tr>
<td>St. Augustine grass</td>
<td>Paspalum dilatatum</td>
</tr>
<tr>
<td>Zoysia japonica</td>
<td>Z colored Z. japonica</td>
</tr>
</tbody>
</table>

1. A slight yellowing of turfgrass may occur within two weeks of application. Any discolored grass is transient and is generally gone within 6-8 weeks of treatment under adequate growing conditions.

2. Do not apply to Centipede grass during the period of winter dormancy. Apply to actively growing grass.

WHEN TO APPLY

**Established Lawns:** Apply when broadleaf weeds are actively growing and prior to germination or tillering of crabgrass. This product may be applied as a single application, as a split application or as a sequential application in the spring, summer or fall as described in the following use programs. Use of split applications 6 – 10 weeks apart may provide improved weed control.

**Newly Seeded Areas:** When establishing a new lawn of Kentucky bluegrass, perennial ryegrass and/or tall fescue, this product may be applied 2 weeks after the first sign of grass germination. For other turfgrass varieties, wait until the grass is well established (3 mowings) before applying this product.

Do not seed, overseed, or spray the treated area for 16 weeks after application.

**Fall Application:** This product may be applied from late summer through early fall (late August through November) for pre-emergence control of all listed weeds that germinate in fall, including annual bluegrass (post annual). When applied in the fall, a second application after 10 to 12 weeks may be necessary to control annual bluegrass (post annual).

HOW TO APPLY

For optimum broadleaf weed control, apply to recently mowed turf when foliage is moist. When possible, delay mowing or irrigation for several days after treatment. The diquat pre-emergent component in this product is not effective until activated by rainfall or irrigation. Performance is improved by 1/2 inch of rainfall or sprinkler irrigation within a 3 day period. Excess weed control may result if not activated by rainfall or irrigation.

Uniform coverage is essential for best results. Before each application, calibrate the spreader according to the equipment manufacturer’s directions. Avoid streaking, skips or overlaps. Adjust the spreader so the spreader delivers the appropriate application rate as specified below:

**APPLICATION RATES**

Apply 152 oz. 7% pts per acre (3.5 to 4.5 lbs per 1,000 sq ft) of this product to control actively growing broadleaf weeds and prevent germination of all listed annual grasses and broadleaf weeds growing in established turf. Broadleaf and gramineous weed species germinate at different times.

Application rates are based on the user’s location, the mowing height of the turfgrass, and whether the application timing is considered to be pre-emergence or early post-emergence. The duration of residual weed control provided by this product is directly related to application rate, but will vary somewhat depending on weather, wind pressure, turfgrass composition, and the users’ location within a region. The following charts show application rates and some of the common broadleaf weeds controlled. The rates vary based on region, which are described as follows:
Use "Regions" within the United States:

□ North
□ South

### POSTEMERGENCE & PREEMERGENCE PROGRAMS - APPLICATION RATES

<table>
<thead>
<tr>
<th>North Region</th>

</tbody>
</table>

Increases postemergent control and provides 4 - 6 months of preemergent control on low cut turf where weed control has been conducted during the previous year. Also provides early postemergence control of crabgrass that has not reached the tiller stage in high cut turf. Applies to all areas as defined above.

1. Use 2 applications, 5 to 6 weeks apart; apply to moist foliage, except in New York.
2. High cut turf such as home lawns and commercial sites.
3. Low cut turf such as golf fairways.
4. In the state of New York, this product may be applied only by commercial applicators at no more than 264 lb (0.5 lb active ingredient of ditlopyr) per acre (6.8 lb per 1000 sq ft) per year. Use of this product in Nassau and Suffolk Counties of New York is prohibited.

### Preemergence Weed Control

Used as directed, this product provides preemergence control and suppression of the following weeds when applied prior to their germination.

- Annual Grasses: crabgrass, large crabgrass, smooth crabgrass, hardy green foxtail, yellow foxtail, barnyardgrass, southern crabgrass
- Broadleaf: goosegrass, ryegrass, annual ryegrass, persimmon, bermudagrass, red clover, dallisgrass, coastal bermudagrass, chicken grass, kikuyugrass, barnyardgrass, johnsongrass

### Established Broadleaf Weeds

- herb: knotweed, purslane, shepherd's purse, speedwell, corn spurge, garden spurge
- must: oxtail, buttercup, pineapple weed, pignut, redroot, parsley, yellow wood sorrel

### Post Emergence Weed Control

Used as directed, this product provides post emergence control of the following weeds:

#### Annual Grasses

- crabgrass, johnsongrass, barnyardgrass, goosegrass, ryegrass, bentgrass, kikuyugrass, dallisgrass, johnsongrass

#### Established Broadleaf Weeds

- knotweed, purslane, shepherd's purse, speedwell, corn spurge, garden spurge

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

- PESTICIDE STORAGE: Store in its original container in a cool, dry, locked place out of the reach of children and animals.
- PESTICIDE DISPOSAL: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.
- CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned stay out of smoke.

### WARRANTY

To the extent consistent with applicable law, Buyer assumes all responsibility for safety and performance if this product is not used according to the directions.

4. FIRST AID:

EYE: Flush eyes thoroughly with water for several minutes. Remove contact lenses after initial 1-2 minutes and continue flushing for several additional minutes. If effects occur, consult a physician, preferably an ophthalmologist.

SKIN: Wash skin with plenty of water.

INGESTION: No emergency medical treatment necessary.

INHALATION: Move person to fresh air; if effects occur, consult a physician.

NOTE TO PHYSICIAN: No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.

5. FIRE FIGHTING MEASURES:

FLASH POINT: Not applicable
METHOD USED: Not applicable

FLAMMABLE LIMITS:
LFL: Not applicable
UFL: Not applicable

EXTINGUISHING MEDIA: Use water fog, CO₂ or dry Chemicals

SPECIAL PROTECTIVE EQUIPMENT FOR FIREFIGHTERS: Wear full protective clothing and use Positive-pressure self-contained breathing apparatus.

UNUSUAL FIRE AND EXPLOSION HAZARDS: None known.

HAZARDOUS COMBUSTION PRODUCTS: Hydrogen chloride may be formed if product is involved in fire.

6. ACCIDENTAL RELEASE MEASURES:

ACTION TO TAKE FOR SPILLS: Contain and sweep up material of small spills and use per label instructions. Prevent run-off.

7. HANDLING AND STORAGE:

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Keep out of reach of children. Harmful if swallowed or inhaled. Causes eye Irritation. Avoid contact with eyes, skin and clothing. Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

STORAGE: Store in original container. Keep tightly closed when not in use. See product label for handling/storage precautions relative to the end use of this product.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION:

These precautions are suggested for conditions where the potential for exposure exists. Emergency conditions may require additional precautions.

EXPOSURE GUIDELINE(S): None established.

ENGINEERING CONTROLS: Good general ventilation should be sufficient for most conditions. Local exhaust ventilation may be necessary for some operations.

RECOMMENDATIONS FOR MANUFACTURING, COMMERCIAL BLENDING, AND PACKAGING WORKERS:

EYE/FACE PROTECTION: Use safety glasses.

SKIN PROTECTION: No precautions other than clean body-covering clothing should be needed.

*Trademark of
LOCKUP/DIMENSION

HAND PROTECTION: Chemical protective gloves should not be needed when handling this material. Consistent with general hygienic practice for any material skin contact should be minimized.

RESPIRATORY PROTECTION: In dusty or misty atmospheres, use an approved particulate respirator. The following should be effective types of air-purifying respirators: particulate filter.

APPLICATORS AND ALL OTHER HANDLERS: Refer to the product label for personal protective clothing and equipment.

9. PHYSICAL AND CHEMICAL PROPERTIES:

APPEARANCE: Multi-colored granules
ODOR: Slight phenol
BOILING POINT: Not applicable
MELTING POINT: Not applicable
VAPOR PRESSURE: Not applicable
VAPOR DENSITY: Not applicable
SOLUBILITY IN WATER: Slightly soluble
SPECIFIC GRAVITY: Not applicable
BULK DENSITY: 45-65 lbs/cu.ft.
pH: 6.5
VISCOSITY: Not applicable
EVAPORATION RATE: Not applicable

10. STABILITY AND REACTIVITY:

STABILITY: Stable

INCOMPATIBILITY: None known

HAZARDOUS DECOMPOSITION PRODUCTS: Under fire conditions, nitrogen oxides, sulfuric oxides and hydrogen chloride gas may be formed.

HAZARDOUS POLYMERIZATION: Will not occur.

11. TOXICOLOGICAL INFORMATION:

Acute Oral Toxicity/Rat: LD50>2000 mg/kg
Acute Dermal Toxicity/Rabbit: LD50>2000 mg/kg
Acute Inhalation/Rat: LC50>2.07 mg/L
Primary Eye Irritation/Rabbit: Mild irritant
Primary Skin Irritation/Rabbit: Non-irritating
Dermal Sensitization: Not a contact sensitizer

POTENTIAL HEALTH EFFECTS: This section includes possible adverse effects, which could occur if this material is not handled in the recommended manner.

EYE: May cause slight eye irritation. Corneal injury is unlikely.

SKIN: Prolonged or repeated exposure is not likely to cause significant skin irritation. Prolonged skin contact is unlikely to result in absorption of harmful amounts. The LD50 for skin absorption in rabbits is >5,000 mg/kg. Did not cause allergic skin reactions when tested in guinea pigs.

INGESTION: Very low toxicity if swallowed. Harmful effects not anticipated from swallowing small amounts. The oral LD50 for rats is >5,000 mg/kg.

INHALATION: No adverse effects are anticipated for single exposure to dust. The LC50 for rats is >3.50 mg/L for 4 hours. This was the highest attainable concentration.

SYSTEMIC (OTHER TARGET ORGAN) EFFECTS: In animals, effects have been reported on the following organs: liver and kidneys.

CANCER INFORMATION: Did not cause cancer in laboratory animals.

TERATOLOGY (BIRTH DEFECTS): Did not cause birth defects or other effects in the fetus even at doses which caused toxic effects in the mother.

REPRODUCTIVE EFFECTS: In animal studies, did not interfere with reproduction.

MUTAGENICITY: In-vitro and animal genetic toxicity studies were negative.

12. ECOLOGICAL INFORMATION:

ENVIRONMENTAL HAZARDS: This product is toxic to fish and highly toxic to other aquatic organisms including oysters and shrimp. Use with care when applying to turf areas adjacent to any body of water. Drift or runoff from treated turf may adversely affect non-target plants and aquatic organisms in adjacent aquatic sites. Do not apply below high water mark. Do not contaminate water when disposing of equipment waters.

ENVIRONMENTAL DATA:

MOVEMENT & PARTITIONING:
Bioconcentration potential is low (BCF <100 or Low Pow <3). Potential for mobility in soil is high (Koc is between 50 and 150).
Partition coefficient, n-octanol/water (Log Pow): -0.354 (measured).
Henry's Law Constant (H): 1.66E-10 atm M³/mole; 25°C (estimated).
Partition coefficient, soil organic car/water (Koc): 104 (measured).

*Trademark of
DEGRADATION & PERSISTENCE:
The rate constant for vapor phase reaction with
photochemically produced hydroxyl radicals at 25°C is
estimated to be 6.05E11 cm³/molecule-sec.
In the atmospheric environment, material is estimated to
have a tropospheric half-life of 2.130 hrs.

ECOTOXICOLOGY:
Material is very highly toxic to aquatic organisms on an
acute basis (LC₅₀ or EC₅₀ is <0.1 in most sensitive species
tested).
Material is practically non-toxic to birds on an acute basis
(LD₅₀ is >2000 mg/kg).
Material is slightly toxic to birds on a dietary basis (LC₅₀ is
between 1001 and 5000 ppm).
The LC₅₀ in earthworm *(Eisenia fetida)* is >1000 mg/kg.
Acute contact LD₅₀ for honeybee *(Apis mellifera)* is >100
µg/bee.
Acute oral LD₅₀ in honeybee *(Apis mellifera)* is >110 µg/bee.

U.S. REGULATIONS

SARA 313 INFORMATION: To the best of our knowledge,
this product contains no chemical subject to SARA Title III
Section 313 supplier notification requirements.

SARA HAZARD CATEGORY: This product has been
reviewed according to the EPA "Hazard Categories"
promulgated under Sections 311 and 312 of the Superfund
Amendment and Reauthorization Act of 1986 (SARA Title
III) and is considered, under applicable definitions, to meet
the following categories:
An immediate health hazard
A delayed health hazard

TOXIC SUBSTANCES CONTROL ACT (TSCA): All
ingredients are on the TSCA inventory or are not required to
be listed on the TSCA inventory.

STATE RIGHT-TO-KNOW: This product is not known to
contain any substances subject to the disclosure
requirements of

Pennsylvania

OSHA HAZARD COMMUNICATION STANDARD: This
product is a "Hazardous Chemical" as defined by the OSHA

COMPREHENSIVE ENVIRONMENTAL RESPONSE
COMPENSATION AND LIABILITY ACT (CERCLA, or
SUPERFUND): To the best of our knowledge, this product
contains no chemical subject to reporting under CERCLA.
